

New

Microsoft Exchange Server 2010

Reduced Cost.

Helps you reduce costs by addressing common infrastructure requirements such as backup, e-mail archiving, mobile e-mail access and voice mail with no need for third-party tools.

Simplified High Availability & Disaster Recovery.

Introduces a simplified approach to high availability and disaster recovery to help you achieve new levels of reliability and reduce the complexity of delivering business continuity.

Easier to use.

Provides new self-service capabilities to help users perform common tasks without calling for help.

Greater Mobility & Flexible Access.

Offers an enhanced universal inbox experience, which provides your users with access to all of their business communications from a single location.

Decreased Inbox Overload & Increased Productivity.

Adds new productivity features which help your users organize and prioritize the communications in their inboxes efficiently.

Transformed Voice Mail!

Users can receive their voice mail messages in their inbox with text preview.

Safeguards for Sensitive Information.

With centrally managed and enforced information protection and control capabilities, it is easy to encrypt, control, and moderate your company's communications.

Reduced Risk of Malware & Spam.

Actively helps protect your communications through built-in defenses against junk e-mail and support for an array of third party security products.
